Abstract (en)
[origin: WO2009087129A1] A receiver is provided with at least one housing (10) and at least one electroacoustic converter (20) with a first and second surface (21, 22). The receiver also has a first volume (100) which is defined by the first surface (21) of the electroacoustic converter (20) and by a first end (12) of the housings (10), and a second volume (200) which is defined by the second surface (22) of the electroacoustic converter (20) and by a second end (11) of the housings (10). An opening (300) is provided between the first and second volume (100, 200). A closing unit (30) acts to at least partially close the opening (300).
