Abstract (en)
The mat (1) has a multi chamber system including an insulating chamber (2) that is divided into a number of insulating chamber elements (21) such that a stationary lightly circulating air layer is present in the insulating chamber in an inflatable condition. The insulating chamber has an elongated sealing chamber (3) that is hermetically separated from the insulating chamber. The sealing chamber is arranged at front sides of the insulating chamber, and fills a gap between the insulating chamber and an inner wall of a window i.e. two-leafed window, or a door frame of a building wall.

Abstract (de)
Aufblasbare Wärmedämmmatte (1) zum vorübergehenden Anbringen vor einem Fenster (9) oder einer Tür. Sie weist ein Mehrkammersystem auf, mit mindestens einer das Fenster (9) oder die Tür überspannenden Dämmkammer (2), die derart unterteilt ist, dass in ihr im aufgeblasenen Zustand eine ruhende oder schwach zirkulierende Luftschicht vorhanden ist.
