Abstract (en)

The device has a machine area (3) provided with an access opening that is closed by a covering part (7). The covering part exhibits a hinge (9) and a pivotable airfoil (11) that is adjusted between opened and closed positions by the hinge, where the hinge is formed as a film hinge. The hinge connects the pivotable airfoil with a fixed airfoil (10), where the pivotable airfoil is placed above a rotation axis in the closed position. The pivotable airfoil rests against the fixed airfoil in the opened position. An independent claim is also included for a method for installing a cooling device.

Abstract (de)

Eine Zugangsöffnung zum Maschinenraum (3) eines Kältegeräts ist durch ein Abdeckteil (7) verschlossen. Das Abdeckteil (7) weist ein Scharnier (8,9) und wenigstens einen mit Hilfe des Scharniers (8,9) zwischen einer offenen und einer geschlossenen Stellung schwenkbaren Flügel (7,11) auf.
