Abstract (en)

[origin: WO2009098034A1] The invention relates to a vehicle window, in particular for a motor vehicle, comprising an outer layer (20) and an inner layer (22), between which a functional layer (24a) is arranged at least in sections, and which can influence the transparency characteristics of the vehicle window. At least one additional functional layer (24b) that also influences the transparency characteristics of the vehicle window is provided. The invention also relates to a motor vehicle comprising at least one vehicle window.
