Abstract (en)

[origin: WO2009083290A1] Disclosed is a hydraulic fluid pump (80) for a motor vehicle brake system, comprising delivery means (110, 120) for delivering hydraulic fluid against a hydraulic counter-pressure prevailing in one part of the vehicle brake system (140, 150). Said hydraulic fluid pump (80) further comprises means (270), preferably an elastomer component in the motor shaft bearing (200, 220), for modifying the volume delivered by the delivery means (110, 120) in accordance with the level of the hydraulic counter-pressure.
