Abstract (en)
[origin: WO2009095205A1] The invention relates to an electric protective component with a short-circuit device, comprising an overvoltage arrester (1) with at least two electrodes (2). Said electric protective component comprises at least one fusible element (3) that has a geometric form and that has at least one cavity (4). A short-circuit bar (5) is arranged on the overvoltage arrester (1), presses against the fusible element (3) and is arranged at a distance from the electrodes (2) by means of the fusible element (3).
