Abstract (en)

[origin: EP2238871A2] The system has a laminar element (4) i.e. commercial panel, comprising a wall-sided surface that is attached to a wall (1) i.e. room wall. A room-sided surface of the laminar element is attached to a room. Two mounting rails (3) are arranged at upper and lower edges of the laminar element. The mounting rails are fixed to the wall and hold the laminar element. The mounting rails comprise a groove (9) for retaining the upper and lower edges of the laminar element to be fixed, where the groove is aligned parallel to the wall and includes two parallel aligned groove flanks (8).
