Abstract (en)

[origin: EP2239115A1] The method involves forming an internal corner (3) by the two edges. An edge strip (2) is attached along an edge (1a) of a work piece (1), and is attached at another edge (1b) of the work piece. The latter edge of the work piece is adjacent to the former edge of the work piece. A pressure tool (4) is used with the pressure surfaces (4a,4b). An independent claim is also included for a device for the execution of the method for attaching the edge strip at an edge of a work piece.
