Abstract (en)

[origin: EP2239203A1] The box (100) has an insertion tab (113) comprising tear-off tabs (116, 118). Closures (106, 107) are designed such that the insertion tab cooperates with a cover tab (112) in a cutout portion (121), so that the tear-off tab is torn along a predetermined break line, when the box is opened at a time and the insertion tab moves over a breaking point (117). The tamper-evident closure is closed by utilizing the closures. A lid flap (111) is placed in the tamper-evident closure.
