Abstract (en)

[origin: EP2239498A1] The light has a housing (2) for defining a light emission area, and a transparent cover (4) arranged in the light emission area, where a gap (10) is formed between the cover and the housing. A circular closed sealing lip (12) is arranged between the cover and the housing, where the cover has a rod (14) that extends circularly along edges (20) of the cover. The sealing lip is arranged at the rod, where the rod has holding elements (16) for holding the cover at the housing. A reflector (28) is arranged in an interior of the housing and extends until the rod.
