Abstract (en)
[origin: EP2239638A2] The watch has a chronograph display unit (1) with a chronograph second needle (1.1) and a chronograph minute needle (1.2). The display unit is attachably and detachably connected with an energy source and a regulating unit of a chronograph mechanism by wheel works. The chronograph minute needle is operated in clockwise direction in a chronograph mode and countdown mode. An initial position of the minute needle is adjusted in counterclockwise direction in the countdown mode. A drive of the minute needle changes from the countdown mode into the chronograph mode.
