Abstract (en)

[origin: EP2239762A2] The lamp (1) has a base (5) arranged at an external bulb (6). An incorporated bulb (2) i.e. high volt halogen bulb, has a pinch seal (14) with narrow and broad sides. An external current feed is projected from the broad sides. A feed line is projected from the base and is designed as a base contact. The line is electrically connected by a connecting device i.e. assembly-clip (20), bent in L-shape, and adapted with side walls at sides of the seal, where one of the walls has a hollow rail. The clip has a contact part connected with the feed, and the rail is connected with the base contact.
