Abstract (en)

[origin: EP2239821A2] The adapter (1) has a contact body (3) connected with a micro- universal serial busplug-contact (2b) or a mini- universal serial busplug contact. The contact body has a bearing surface (5) for attachment at a surface of a mobile device. The contact body has a contact surface (6) with laminar contacts, which is designed as strips. The contact body has two recessed gripping units (13), which are arranged opposite to each other. The contact body is designed as a covering cap and a bracket in a flat shape. An independent claim is also included for an arrangement with a mobile device, holder and adapter.
