Abstract (en)

[origin: WO2009095342A1] The invention relates to an ejection device (6) for a furniture part (3), which is movably mounted on a furniture body (2), having an ejection element (10), an electric motor (11), which drives the ejection element (10), and a control unit for controlling the electric motor (11), wherein said device (6) also has a velocity measuring unit, for establishing an instantaneous insertion velocity of said ejection element or said movable furniture part (3), which is operationally linked to said control unit for the velocity-dependent actuation of said ejection element (10). In addition, a method for actuating an ejection lever (10) of an ejection device and a piece of furniture having an ejection device (6) are described.
