Abstract (en)

[origin: WO2009095130A1] The invention relates to an interface element (1) to be fixed on and/or in an interface element holder (2) of an electrical appliance, said element comprising a hard component portion (6). The invention provides a positioning portion (9) which is formed from an elastic material and makes it possible for the hard component portion (6) to move relative to the interface element holder (2) as a result of deformation. The invention also relates to an interface element holder (2) and to an electrical appliance.
