Abstract (en)
[origin: WO2009098067A1] The invention relates to a profiled strip device, particularly a profiled strip device for a frame, e.g. for producing an inspection device. In its basic design, said profiled strip device comprises a first profiled strip (1) and a second profiled strip (2). The second profiled strip (2) has at least one fastening head (3) which engages into at least one receptacle (4) on the first profiled strip (1). According to the invention, the fastening head (3) engages into the at least one receptacle (4) in a substantially positive and releasable manner.
