Abstract (en)

[origin: WO2009098152A1] The invention relates to a passenger guidance method which comprises the following steps: receiving a signal that is transmitted by a transmitter and that has an identifier (S1); calculating a position of the transmitter using the signal (S2); and outputting the position information to the transmitter (S6). The aim of the invention is to devise a passenger guidance method which helps the driver of a motor vehicle find his parked motor vehicle. To achieve this aim, the method comprises a step of identifying the transmitter before outputting the position information (S4).
