Abstract (en)

[origin: WO2009076555A2] Methods, computer program products and systems are described for online content management. Features include receiving content from multiple contributors for public online display, authenticating authors of the content, receiving input from users other than authors of the content regarding the quality of the content and determining a reputation score, authentication score and/or credibility factor for authors of online content. A collaborative editor can also be provided for editing online content.
