Abstract (en)
[origin: WO2009100820A2] The invention relates to an actuating magnet for a magnet valve, said magnet comprising a non-magnetic pressure tube that is connected to at least one pole core in which an armature is embodied and on which at least two annular sleeves that are separated by a ring are placed, on the area on which a gap embodied between the armature and the pole core is arranged. Also, said actuating magnet can be produced in a simple manner by placing the annular sleeve and separating rings on the pressure tube.
