Abstract (en)

[origin: EP2241450A1] The divider (ZZ) has a leg joint (2) provided at an upper divider head (1) of divider legs (Z1, Z2), and an adjusting spindle (6) rotatably supported at a threaded bearing (7) in proximity of the leg joint. The spindle projects from the legs according to degree of spreading of the legs, and lead or pin fasteners (3.1, 3.2) are arranged at a lower end of the legs. A spindle protection cover (SSK1) is provided for rotation of the spindle and adjustment of the legs. The cover widely covers the spindle, where the spindle and the protective cover are made of plastic.
