Abstract (en)

[origin: EP2241669A1] Washing machine (1) comprising: - a washing tub (5) containing a rotary perforated drum (6); - a washing/rinsing-liquid dispenser (8) comprising a housing (9) and a drawer (10), removably associated to the housing (9), provided with one or more compartments (11a,11b) adapted to be filled with washing and/or rinsing products, the washing/rinsing-liquid dispenser (8) comprising a water distributor (14) provided with at least two inlet connectors (15a,15b), connectable, upstream, to a water source, and fluidly connected, downstream, to an air-gap (16) from which at least two ducts (17a,17b) branch off, the at least two ducts (17a,17b) being fluidly connected to the inlet connectors (15a,15b) and adapted for conveying water to the compartments (11a,11b); - a water line (13), fluidly connecting said washing/rinsing-liquid dispenser (8) and said tub (5). The washing/rinsing-liquid dispenser (8) comprises a by-pass line (20), fluidly connected, upstream, to at least one of the inlet connectors (15a,15b), and extending substantially from said air-gap (16), the by-pass line (20) being fluidly separated from the ducts (17a,17b) and from the compartments (11a,11b), and being adapted to allow the flow of clean water from the washing/rinsing-liquid dispenser (8) to the tub (5).
