Abstract (en)  
[origin: WO2009103453A1] In order to provide a drawer guide, which has at least three rails, for guiding a drawer which can be withdrawn from a carcass, comprising an outer rail, at least one centre rail which is mounted on rolling bodies, an inner rail which is mounted on rolling bodies and at least one damping apparatus, which drawer guide requires only a narrow installation space and permits high loading and/or great drawer travel, the invention proposes that at least one rolling body track of at least one centre rail is arranged at least partially between at least one damping apparatus and a rolling body track of the inner rail when the drawer guide is in the fully inserted state.
