Abstract (en)
[origin: WO2009074201A1] A document input module (2) for the input of documents (9, 91, 92, 93), with at least one MICR section (10), with a reading head (3) for reading the at least one MICR section (10) relative to a system (8) of input documents (9, 91, 92, 93), is characterized in that the document input module (2) comprises at least one further reading head (4, 5, 6) for reading different formats and input positions of input documents (9, 91, 92, 93). According to one version, the input module comprises only one reading head (3) or a plurality of reading heads (3) on one side of the documents to be input and a computing unit that is associated with the document input module and has an evaluation program, which is designed to detect MICR writing on the side of the input documents facing away from the reading heads.
