Abstract (en)
[origin: EP2243397A1] The present invention refers to a system for vertically adjusting a shelf, such as in refrigerating appliances, cabinets, lockers and similar, said shelf comprises horizontal support members (10, 11) arranged perpendicularly to vertical guides (1, 2) where they can be vertically adjusted, and a deposit plate (12), a drawer or similar, being attached to said horizontal support members (10, 11). The invention is based on a fact that said shelf is fixed in a form-locking and friction-type manner in vertical guides (1, 2) by means of horizontal support members (10, 11).
