Abstract (en)

[origin: EP2243518A1] The mask has a mask body (2) containing a filter material, and an exhalation valve (5) that penetrates the mask body. The exhalation valve has a condensation-surface that stay in connection with a condensate receiving area (11) in the mask body. The condensation-surface is aligned in line with the mask body. The condensation-surface exhibits a guide surface directed to the receiving area. The condensation-surface is provided at a cover (8) of the exhalation valve that lies against the mask body.
