Abstract (en)  
[origin: EP2243605A1] The present invention is concerned with a hybrid hair removal device that comprises an electrical hair removal device (20) having a body (21) that is intended for being gripped by a user's hand and a head (22) that is intended for contact with a user's skin during regular operation, and an attachment (10) that comprises a handle structure (11) that detachably envelopes at least a part of the outer surface of the body (21) and a skin treatment unit (15) mounted at the handle structure (11). Such a hybrid hair removal device allows easily detaching the attachment (10) from the hair removal device (20). The invention is also concerned with such an attachment (10).
