Abstract (en)  
[origin: EP2243681A2] The device has a closure plug, a closure piece and a tongue block (2), where the closure plug is actuated by a cam- or sliding bar. The closure plug is mounted in the tongue block in a pivoting manner. A switch rail is detachably connected with the tongue block and is locked at the tongue block by a wedge (11). The wedge is connected with the tongue block by a coupling element (16). The device is formed as latch or vertical clasp closure.
