Abstract (en)

[origin: WO2009098083A1] The invention relates to a method for filling a capsule with a pharmaceutical active-substance formulation. According to the method, the capsule consists of two capsule parts (a capsule body and a capsule cap) and the two capsule parts, without being previously interlocked when empty, are only fitted together in a telescopic manner once one capsule part has been filled with a pharmaceutical active-substance formulation. The invention also relates to a device for carrying out said method.
