Abstract (en)  
[origin: WO2009106066A1] The invention relates to a security and/or value document (1) comprising personalized comprehensive graphic data (2) composed of at least two pieces of partial graphic data (3, 4) that overlap in a direction (R) perpendicular to a main area (H) of the security and/or value document and complement each other to form the comprehensive graphic data, the partial data being represented using identical or different imaging technologies and being copied onto the same or different layers (5, 6) of the security and/or value document. One or more security elements (7) are arranged at least in one subarea of the comprehensive graphic data, above, below, and/or between the layers in a direction (R) perpendicular to a main area of the security and/or value document. The surface of the security and/or value document is formed by a protective layer (8) without a security element.
