Abstract (en)
[origin: WO2009092542A1] The invention relates to a shifting device, particularly for bicycle gearshifts, having an attachment device (2) for the installation of the shifting device on a handle bar (3) or similar steering unit, and having a shifting lever (10) for manual operation. The shifting device is characterized in that a single shifting lever (10) is provided for both shifting devices, the shifting lever (10) is pivotally supported about two different axes (6, 15), and a shifting device is associated with each pivot axis (6, 15).
