Abstract (en)  
[origin: WO2009090132A2] Disclosed is a fluid pump comprising a fluid inlet (1), a fluid outlet (4), and a displacer stage (6) in a pump housing (2). The displacer stage (6) is driven by means of an electric motor which has a rotor (7) and a stator (8) and is disposed in a motor housing (1). The fluid pump further comprises a contact piece (5, 5') for the electric motor and is characterized in that said contact piece (5, 5') is integrated into the pump housing (2). The invention also relates to the use of the fluid pump as an electric fuel pump or oil pump for a motor vehicle.
