Abstract (en)
[origin: WO2009103679A2] The invention relates to a refrigerating appliance comprising at least one no-frost storage compartment (7) and a mobile control element (40a, 40b) for controlling at least one circulation condition of the circulating air in the storage compartment (7). A motor (39) is used to move the control element (40a, 40b). A control unit (56) is set up to adjust a position of the control element (40a, 40b) according to a value relating to the circulation condition and specified by a user, by means of the motor (39).
