Abstract (en)
[origin: EP2245962A2] The display (1) has an operating element (3) arranged between wall units (2) that are connected together. One of the wall elements includes a locking strap formed at lower edges, and a receiving pocket is provided at an upper edge. The operating element is formed at a lower side with a plug-in element, where the locking strap and the plug-in element are guided in the receiving pocket of the wall elements. The plug-in element is formed with a through-passage opening, and a recess is formed above the plug-in element in a region of the operating element.
