Abstract (en)

[origin: EP2245963A1] The device has connection bolts (17) and flexible switches provided at a distance to each other. Units of adjusting holes (13) corresponding to a number of the bolts and the switches are provided in one of a drawer (10) and a slide rail (11). Distances of the bolts and the switches to distances of the holes are varied. The bolts, the switches and the holes lie in a displacing plane. Guides (15) are open at a side turned towards unlocking pins (18). An unlocking slide (19) movable in a longitudinal direction of the bolts is arranged at a side attached to the unlocking pins.
