Abstract (en)
[origin: EP2246470A1] A washer-drier machine(1) with a drying circuit with an intake unit (17, 18), a heat exchanger (10) and a heating unit (21) communicating with each other by means of a drying duct (16), wherein the drying circuit further comprises an absorption device (23) and the washer-drier machine (1) is configured such that, during a drying program, the drying air (22) is conveyed both through said heat exchanger (10) for a dehumidification by condensation and through the absorption device (23) for a moisture absorption through an absorbing material.
