Abstract (en)

[origin: WO2009109536A1] The invention relates to a pull-out system for the power-assisted method of a push element (1), mounted linearly movably at a corpus (2) with a spring element (4) providing a force between the push element (1) and the corpus (2), characterized in that a first coupling point (5) is provided at the push element (1) and that the push element (1) is supported over the hinge point (5) at the corpus (2) in a hinge connection over the spring element (4) in a springy, prestressed manner.
