Abstract (en)  
[origin: WO2009106236A1] The invention relates to molded polyurethane foam articles containing flame-retardant solids, a method for the production thereof, and the use thereof for parts in which fire-retardant properties are desired. Said molded polyurethane foam articles are made of molded polyurethane foam and are characterized in that the percentage of a flame-retardant solid is higher in a surface region than the percentage of said flame-retardant solid in an internal region of the molded polyurethane foam article.
