Abstract (en)

[origin: WO2009109612A2] In order to create a vapor extraction device, comprising at least one air curtain generating device and at least one vapor suction device having at least one vapor suction opening, wherein said vapor extraction device enable almost complete suction of the vapors, it is proposed that by means of the air curtain generating device an air curtain can be generated, which is oriented such that at least part of the air flow forming the air curtain impinges on at least one vapor suction opening.
