Abstract (en)

[origin: WO2009106235A1] Disclosed is an antenna array for a motor vehicle, comprising at least one AM antenna for receiving at least long wave, medium wave, and/or short wave signals, and at least one electrically conductive component that adjoins the AM antenna and is connected to a frame potential and/or supply potential of the motor vehicle via at least one filter element which allows signal frequencies to be suppressed in at least one frequency range to be received by the AM antenna.
