Abstract (en)
[origin: WO2009100906A1] The invention relates to a coaxial line in which the support disks (2) are moulded directly onto the inner line (1) according to the plastic injection technique. Also, a surrounding adhesive channel (3) is formed on the outer periphery of the support disk (2), said adhesive channel enabling the support disk (2) to be stuck in the outer conductor (5) by filling with an adhesive.
