Abstract (en)

[origin: WO2009112760A1] The present invention relates to the transfer of a communication session previously established between a first local terminal (T1) of a plurality of local terminals (T1, T2, T3) connected to a domestic gateway (P) and a remote terminal (T1). In response to a transfer request (E4) sent by the first local terminal (T1), the domestic gateway (P) performs a step of transferring (E5, E6, E8, E9, E10) the communication session (S) to the local terminals (T2, T3) of said plurality of local terminals (T1, T2, T3) with the exception of the first local terminal (T1).
