Abstract (en)
[origin: EP2248758A2] The truck has an energy supply unit (3) arranged within a frame (1) in a battery compartment (2). The frame is provided with a lateral opening (6). The supply unit is movable relative to the battery compartment in horizontal direction through the opening. The supply unit stands on a flat contact surface during operation of the truck. The energy supply unit is operatively connected with rollers of a roller conveyor (10) for changing the power supply unit, where the rollers are arranged in a region of a base surface (7) of the battery compartment. The energy supply unit stands on the rollers.
