Abstract (en)
[origin: EP2248973A2] The device has a leaf element (2) movable around a hinge fixed to a frame element (1) fixedly connected with a building. The frame element includes a closing part (4) at a side turned to the hinge. The closing part is shiftable up to the leaf element and provided in an area of the frame element, where the area is turned to the leaf element. The closing part extends over the entire height of the leaf element and includes a closing unit (8) that closes a gap (3) between the elements over the entire height of a window or door, where the leaf element includes an appropriate recess (9).
