Abstract (en)

The invention relates to a firing and drying system (8), which is developed for both reducing moisture of the product and during drying reducing the amount of micro organisms found in the product via its very special air speeds, very high air flows, and equal temperatures in order to obtain semi-dried products from fresh fruits and vegetables in the food sector, and which comprising a computer (10); a steam boiler; and a drying room (1) which comprises fans (2), fan motors (2.1), fan cabinets (3), product trays (4), tray carts (5), serpentine (6), chimneys (7), chimney motors (9), suspended ceiling (11), humidity and temperature sensors.
