Abstract (en)

[origin: EP2249325A1] The motor vehicle (1) has a controller (2) for controlling various functions of the motor vehicle. A receiving device is provided for receiving external data, where a sensor (6) is provided for detecting data from an immediate vehicle environment. The data is transferred to another motor vehicle with a transmission device. The data has an influence on driving characteristics of the motor vehicle. An independent claim is also included for a method for controlling different functions of a motor vehicle.
