Abstract (en)  
[origin: EP2249439A2] The connector has a segmented traction relief unit (2) and a sealing unit (3), which is pushed from traction relief unit in to a sealing position within a mounting connector. Segments are provided, which are connected with each other by film elements, and which form a clamping ring. The clamping ring is cut in a cable. The traction relief unit is formed with a front surface of the clamping ring to push the sealing unit.
