Abstract (en)

[origin: WO2009108970A1] The invention relates to a furniture drive (2) with a drive unit which comprises an electric motor (3) and a roller (5) that is rotatable about an axis, the roller (5) having a surface for attaching or winding up a flexible force transmission means (26). According to the invention, the radial distance of the surface changes in the rotational direction of the roller (5) for forming at least one control cam (6, 7) for the force transmission means (26).
