Abstract (en)

[origin: WO2009094738A2] System for final disposal of waste by compacting and bagging, comprising a set of operations used for determining the best manner of disposing of waste in general (garbage), making use of a system with or without recycling, and using high pressure compaction in order to reduce the empty spaces and liquids as a result of the compaction and existing in the waste, for the purpose of their further bagging for conditioning and disposal in proper places.
