Abstract (en)

[origin: WO2009097959A1] The invention relates to a ballast plow (1) for applying ballast to a track, comprising two transverse conveyor belts (12) positioned directly in front of a sweeping brush. Said belts each comprise a drive (11) and are disposed parallel to each other relative to a transport direction (13) and one directly behind the other relative to a longitudinal direction of the machine (17). A cover strip (19) is provided for bridging a gap (18) between the two transverse conveyor belts (12).
