Abstract (en)
[origin: WO2009099345A1] Construction element consists of open-work warp filled with thermo-insulating cores. Transverse planes (6,7) of the warp connecting crosswise the face walls (1) of the construction element form a broken line with bend angles smaller than the right angle, and internal, longitudinal walls (2) of the warp are profiled along a wavy-like broken line, and their connecting members (6,7) are placed in the widest places of the insulators (3,4,5).
